

MJ - Soil/Soilless	VEG			Bloom									
Per Gallon Mix & Feed Amendments Weekly Totals	Less than 1 gallon pots	≥ 1 gallon pot	week B4 Flwer ≥ 1 gallon pot	1 Early Bloom	2 Early Bloom	3 Early Bloom	4 Mid Bloom	5 Mid Bloom	6 Mid Bloom	7 Late Bloom	8 Week B4 Flush Late Bloom	9 Flush Days 1-4	9 Flush Days 5-7
	Enhance MC	0.5 mL	1 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	2 mL	6 mL
GLB Micro- <i>Must Dilute</i>		1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL	1.5 mL		
GLB Micro 6-0-0 Concentrate - Dilute 1 mL of GLB Micro into 1 oz of water and use diluted solution for application rates above													
Liquid Organic Matter	3-6 mL	9-12 ml	12 mL	12 mL	12 mL	12 mL	12 mL	12 mL	12 mL	12 mL	12 mL		
Liquid Organic Matter is to be used in mix and feed only not hydro systems as residue can build in drip emitters													
GLB Brix57 F <i>Day 17</i>						3 mL	3 mL	3 mL	3 mL	3 mL	4 mL		
Bloom Accelerant				3-6 mL	3-6 mL	3-6 mL	3-6 mL	3-6 mL	3-6 mL	3-6 mL			
Bloom Accelerant 0.5-17-17 PK Boost when used as an amendment adding on top of Non GLB products													
GLB Micro DS		1 mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL		
GLB Micro DS- Already Diluted Solution use as is do not dilute any further and use either GLB Micro or GLB Micro DS- Not Both													
<b>Please Read Information Below</b>													
Enhance MC	Due to the 6% Fulvic acid within Enhance MC you may find your current nutrients do not contain enough or the proper micro nutrients. We recommend a GLB Micro amendment dose for better micro nutrient health												
GLB Micro	There is a concentrated and diluted version of GLB Micro, use either but not both. A proper amendment to NON GLB products lines will raise the quality of your secondary metabolites (trichomes, terpenes, flavonoids).												
Liquid Organic Matter	LOM will hold additional water in your pots due to the Anion and Cation Exchange Capacity and raise secondary metabolites in your plants.												
GLB Brix	<b>Flower Stretch</b> - we do not recommend to use Brix57 during stretch in flower until Day 17-21 On <b>Start of Flower</b> - Optional- 0.25-.5 mL at flip if you want your plants to stretch & know your genetics Too much sugar will stretch internodal spacing more than most desire unless again you know your genetics.												
Quality & Yield	Applying Enhance MC, GLB Micro and GLB Brix57 you will get additional weight, resin and trichome production, but by adding Liquid Organic Matter you will raise terpene production as well as additional trichome production.												
Weekly Totals	Each grower applies nutreints at varied applications take the weekly total and divide into the number of times you feed your plants nutreints per week. The more times you feed the more even the applications.
